Profile

Motivated ICT undergraduate at the University of Colombo, Faculty of Technology, specializing in network infrastructure, cloud architecture, Linux/DevOps, and full-stack development. My work focuses on resilient systems, automation, and scalable infrastructure solutions.

Skills

Networks: Routing & Switching, VLAN, DHCP, Inter-VLAN Routing, Cisco Packet Tracer

Cloud: AWS Cloud Architecture, Firebase Auth, Firebase Firestore

Linux / DevOps: Linux Administration, Service Monitoring, Git, GitHub, Python, Node.js

Languages: Java, C/C++, PHP, JavaScript, SQL, React, React Native, Express.js

Databases: MySQL, MongoDB, Firestore

Projects

Bank Network & Campus Network Infrastructure - Cisco Packet Tracer networking design

Real-Time Service Monitor - Automated service health and uptime monitoring

E-Donor - Blood donation platform with web-based donor coordination

TaskMate - Task management mobile app with Firebase synchronization

Education

BICT (Honours) | University of Colombo, Faculty of Technology

G.C.E. Advanced Level | Island Rank 253 in Engineering Technology

Certifications

AWS Academy Graduate - Cloud Architecting

API Redmail Integration Security Workshop

Web Application Development Workshop

Career Objective

Seeking a Software Engineering or Network Engineering internship starting September 2026.
